

Scotty P's is Committed to Safety:

With the growing concerns in our community over the Coronavirus (COVID-19), we wanted to let you know what Scotty P's is doing to ensure a safe and enjoyable dining experience:

- 1. We view the daily Coronavirus Task Force Press Conference and pass along new information to our leadership teams at all locations.**
- 2. We receive helpful information from local Fire Departments and again share that information with our teams.**
- 3. While health, food safety and personal hygiene have always been apart of our training, and daily standard practices:**
 - a. We are educating our staff on good safety practices and reminding them at the start of our shifts the importance of following these practices.**
 - b. We are sanitizing all touch points in our restaurants more frequently, including a full sweep prior to open, throughout our day and more thoroughly between meal periods.**
 - c. We have shared with our team the importance of NOT coming to work if they feel any illness or respiratory issues or have any fever at all.**
- 4. While we always encourage frequent hand washing, we have increased this frequency as well. We follow CDC and Environmental Health standards for hand washing and also have hand sanitizer available at our employee wash stations.**
- 5. Upon your request, we can serve any item in a disposable container and provide single use plasticware.**
